SAC CENTRE FOR ENTREPRENEURSHIP, INNOVATION AND INCUBATION

Forward

Welcome to the 4th edition of the SACCEII newsletter! This issue is dedicated to our student community - the aspiring entrepreneurs, the dreamers, and the doers who are paving their path to success and inspiring their peers on their way.

While the past quarter may have been dominated by exams, it's certainly not been quiet on the entrepreneurial front at SACCEII. In fact, this edition is dedicated entirely to our incredible Anthonians who are taking the leap into the world of entrepreneurship! We have assisted our student entrepreneurs in applying for the PRIME Student Tinkering Fund. We are hopeful that our students will secure the much-needed funding to turn their ideas into reality and their stories are featured in this edition. We have also featured the testimonials of our first batch of incubatees who have successfully completed their incubation program. This edition also shines a spotlight on the entrepreneurial journey of our Alumni and current students.

Furthermore, we have included valuable insights on the importance of personal branding for student entrepreneurs, as well as a session on cash bookkeeping conducted by our faculty facilitator. And of course, don't miss our Anthopreneur Spotlight, where we celebrate a graduating student member.

We invite you to explore this edition and be inspired by the remarkable stories of our students. May their journeys ignite the spark within you to embark on your own entrepreneurial adventure!

Warm regards,
Vila Theunuo
Program Co-Ordinator Intern
SACCEII

CO-ORDINATOR'S NOTE

The release of this issue of the SACCELL newsletter coincides with a pivotal moment: we are concluding the second cohort of our Pre-Incubation programme, and I've just returned from a five-day faculty exposure visit to India's leading startup and innovation campus i.e. the T-Hub, and its affiliated networks in Hyderabad, Telangana.

Our journey with SACCELL began about two years ago, marked by uncertainty about the center's potential and objectives. Starting almost from scratch, we've since made significant strides, developing processes and methodologies uniquely tailored to the needs of student community. Distinct from traditional departments, SACCELL collaborates closely with students to cultivate an entrepreneurial ecosystem through innovative modules such as events, field visits, competitions, boot camps, and speaker sessions. Defining SACCELL's operational pathway has presented numerous challenges, each reinforcing our belief that innovation, hard work, courage, honesty, grit, and resilience are essential for progress and success.

Launching the second cohort of Anthopreneurs was a milestone with clear objectives. While five participants opted out early, recognizing the demands of the programme; our dedicated focus remains on the thirty students who embraced the challenge, trusted us to mould them, and believed in their entrepreneurial dreams and latched on to a path and assignments that were often unknown- uncertain; but never boring!!!

I take immense pride in the growth of these 30 Anthopreneurs from the second cohort, who have emerged as significantly more confident individuals. Several have even launched and scaled up entrepreneurial ventures with monthly sales exceeding six figures, setting a benchmark for aspiring college entrepreneurs.

At this moment, I would like to extend my heartfelt gratitude to our program intern, Vila, who joined us in September, 2023. Her contributions to the centre have been immeasurable, and her adaptability to various circumstances and chaos is truly noteworthy. She has tirelessly worked to infuse our newsletter with personality and flair.

So, as we prepare ourselves for the journey ahead, I am asking myself- what next? I am gazing at the various tangents of growth that the centre can take to instil an entrepreneurial and innovative mindset across all our courses, students and faculty.

Crucially, moving forward, we are pondering as to how SACCELL can enhance the Anthonian brand value...

Regards,
Dr. Rajani K Chhetri
Co-Ordinator
SACCELL

ALUMNI SPOTLIGHT: THE JOURNEY OF TURBIT

Founded by passionate alumni of St. Anthony's College, Turbit is a makerspace dedicated to democratizing technology and fostering innovation among aspiring creators. This is the story of how a unique venture is transforming the way creativity and technology intersect.

The Genesis of Turbit

The seeds of Turbit were sown in early 2018 when one of the co-founders discovered a passion for sculpting. Spending countless hours honing their skills, they quickly realized that a lack of resources and tools was a common barrier among artists and DIY enthusiasts. This shared struggle sparked the idea for Turbit—a space where creativity could flourish, equipped with the necessary tools and support for budding innovators.

The journey began when they participated in a pitching event in Shillong, armed with a virtual reality experience of their vision. Their idea caught the attention of influential figures, including Father Jerry Thomas from the Bosco Institute of Social Work, leading to a partnership that would help establish their first makerspace.

The co-founders, Ayesha and Chancharik, initially crossed paths as mere acquaintances during their college days. Their collaboration blossomed at a local art event, where they discovered their shared interests in creativity. Ayesha's expertise in event management complemented Chancharik's knack for ideation and system creation, forming a dynamic partnership that has been instrumental in Turbit's success.

Their complementary skills have allowed them to create a space that not only provides tools and resources but also fosters a sense of community among users. As Chancharik humorously puts it, "If we were a car, I'm the engine and she is the transmission. I generate the ideas while she ensures we don't drive off cliffs!"

The Turbit Vision

At its core, Turbit is built on four simple tenets:

1. Technology should benefit every member of society.
2. Cutting-edge technology should be accessible to all.
3. Creative problem-solving and adaptability are the skills of the future.
4. Learning should be self-driven and self-motivated.

Challenges and Triumphs

Facing initial skepticism, the founders took an innovative approach to pitch their idea. They learned 3D modeling and created a virtual reality experience of their ideal makerspace. This VR pitch became their golden ticket, opening doors and minds to their vision.

Their break came when Father Jerry Thomas of Don Bosco Institute in Jorhat and Prof. Don Syiem of NEHU Shillong recognized the potential of their idea. These "angels" (not investors, but true supporters) provided them with empty rooms, budgets, and the magical words: "Go." This trust and creative freedom became the foundation of Turbit's growth.

Their efforts have not gone unnoticed. Turbit has secured international funding, won a fellowship and grant from Meta for their work with virtual reality, and been named among the Top 10 visionary communicators, artists, and public intellectuals of India in 2023.

The venture has also caught the attention of major players. They've partnered with NEHU's Design Innovation Center, been recognized as 'industry experts' in virtual reality by the MSME cell in Shillong, and even showcased their work to Union Minister Shri Piyush Goyal.

Community Impact and Future Aspirations

Turbit's impact extends beyond its walls. The makerspace has become a hub for local entrepreneurs and students, where they can collaborate on projects ranging from plastic recycling machines to remote-controlled toys. The community response has been overwhelmingly positive, with regular inquiries about workshops and programs.

Looking ahead, Turbit aims to expand its reach by establishing a chain of creative spaces throughout the region. Their immediate goals include developing methods to teach 3D design to rural communities and popularizing virtual reality as a planning tool. "We aspire to empower self-reliance and bridge the gap between high technology and underserved communities," Chancharik emphasizes.

And of course, as the founders humorously add to their future goals: "Also get more sleep."

Advice for Aspiring Entrepreneurs

For students looking to follow in their footsteps, the Turbit founders offer this advice: "The fool is the precursor to the master. If we want to master anything, we must be willing to start out looking like a fool."

They emphasize the importance of reading widely, asking questions, and being willing to take the leap. "There is no simple way, no obvious route to your destination. The only option we have is to just go for it and trust that the colour of your path will reveal itself."

From a creative spark to a thriving venture, Turbit embodies the spirit of innovation and community. As they continue to grow and inspire, one thing is clear: in the world of Turbit, the only limit is your imagination.

INCUBATEE TESTIMONIALS

BENHESEDH EDRICH THABAH

Ed's Donuts

"My love for cooking and baking inspired me to start my own donut business, Ed's Donuts, as a side hustle while in college. My dream was to open my own donut shop and build a brand for my unique creations.

Though the competitive landscape and market dynamics posed challenges, the guidance from SACCELL kept me motivated. There were times I considered stopping, but the teachers encouraged me to persevere.

Managing a large order for an exhibition event was a true test, teaching me that running a business requires sacrifice and commitment.

This experience has transformed me - I'm now more confident and capable of handling problems. In the future, I plan to expand Ed's Donuts into a chain of outlets, both locally and beyond. The incubation program prepared me well for the next phase of my entrepreneurial journey."

JOTI RANI HAJONG

JRH Jewels

"My dream of creating beautiful, handcrafted jewelry came alive with JRH Jewels. But like many aspiring entrepreneurs, I faced hurdles – finding the right workspace, managing academics, and gaining brand recognition. SACCELL's incubation program became my rock. Their workshops on finance, marketing, and time management equipped me with the knowledge to navigate these challenges. The mentorship program provided invaluable guidance, helping me refine my strategies and make informed decisions. SACCELL's support wasn't just theoretical – their funding helped me purchase essential materials, and their exposure trips broadened my perspective.

Thanks to SACCELL, I'm no longer just an entrepreneur with a dream. I'm a resourceful and resilient business owner with the skills and confidence to turn JRH Jewels into a success story."

MELANIE RIYANA S HYNNIEWTA
Mel-Licious

"When I started Mel-Licious Cosmetics and Bodycare, I dreamed of creating natural beauty products that made people feel confident in their own skin. SACCELL's incubation program helped turn that dream into reality.

The journey wasn't without challenges. Standing out in the competitive beauty industry and navigating market dynamics tested my resilience. However, with SACCELL's support, I developed strategies to overcome these obstacles. Their mentorship and networking opportunities were invaluable.

Through this experience, I've learned the power of community, the importance of adaptability and the value of continuous innovation. I've evolved as an entrepreneur, enhancing my leadership skills and broadening my skillset.

Looking ahead, I aim to expand Mel-Licious, increase our market reach, and reinforce our commitment to sustainability. SACCELL has prepared me for this next phase, equipping me with the tools and confidence to grow my venture.

This journey has transformed my perspective on entrepreneurship. It's not just about success; it's about making a positive impact while staying true to your vision. Thanks to SACCELL, I'm ready for the challenges and opportunities that lie ahead."

FROM STREET SINGJU TO BOBA

THE STORY OF BUBBLY BOBA

Their story begins in the campus of St. Anthony's College, Shillong. Borishon, a military brat with a diverse upbringing spanning Nagaland, Manipur, Punjab, Delhi, Kolkata, and Shillong, found common ground with Niroda, a native of Imphal, Manipur. United by a shared dream of building something of their own, they started selling Singju during college events. As their confidence and skills grew, the duo decided to take their business to the next level. In March 2023, Niroda and Borishon took the leap and set up a modest Singju stall near Beat

nothing but a few stools and buckets. "We didn't have the budget to open a shop," Niroda recalls, her eyes gleaming with the memory. "So we took to the streets." The challenges were immediate and daunting. Finding a spot in Shillong's cramped streets proved to be a Herculean task, requiring negotiations with different local Headmen for permission. Even more challenging was overcoming their own inhibitions. "During the first week, we were quite shy," Borishon admits. "But we knew we had to get over it for our business to succeed."

Just as their Singju business began to flourish, fate intervened. The Manipur violence of May cast a shadow over their street venture. Faced with an atmosphere of hostility, Niroda no longer felt safe on the streets. Some entrepreneurs might have given up, but not these two. They pivoted, channeling their earnings into an online clothing store, Justbasics Shillong. However, the allure of street vending was too strong to ignore. "We missed selling on the streets," Borishon says. "So we decided to start again, this time with something different." Their subsequent chicken roll venture met with lukewarm response. Another setback another lesson learned.

It was during a vacation that the idea of Boba tea struck them. "We both love Boba tea," Niroda explains. "But we noticed it was quite expensive. So we made a pact to sell affordable Boba so that everyone could enjoy it."

Niroda and Borishon, fifth-semester Mass Media students have transformed their humble beginnings as from setting up stalls in the college during events to street vending into a thriving boba tea business. Bubbly Boba Shillong, their brainchild, embodies the duo's grit, creative flair, and knack for seizing opportunities.

Niroda and Borishon have come a long way from their early days of setting up stalls in college and selling street Singju. Now, as they stand behind the counter of their established business, they feel a sense of accomplishment. The sight of children eagerly waiting for their drinks, singing "Boba Boba Bubbly Boba," reminds them that their hard work has paid off. Despite facing numerous challenges and setbacks, Niroda and Borishon have not only built a successful business but have also become an inspiration for others to pursue their entrepreneurial dreams.

BUBBLY BOBA

Menu

Milk Boba

1. Coffee Boba	- Rs 100
2. Oreoshake Boba	-Rs 150

START STRONG: BUILDING YOUR PERSONAL BRAND AS AN ASPIRING STUDENT ENTREPRENEUR

-contributed by Vila Theunuo

Ever dream of launching your own startup?

The journey to becoming a successful entrepreneur starts long before you write your first business plan. One crucial step you can take right now, as a student, is to build a strong personal brand. What is personal branding? Imagine it as your unique identity online and offline. It's the way you present yourself, your skills, and your passion for your future startup idea. For aspiring entrepreneurs, a strong personal brand can be a game-changer.

Why Build Your Brand Now?

Many students wait until they launch their startup before considering personal branding. But here's the secret: the earlier you start, the stronger your foundation will be. By starting in college, you can build experiences, stories, and connections to draw from later. St. Anthony's College is filled with opportunities, so attend workshops, guest lectures, and programs relevant to your interests. Network with professionals and build relationships.

Here are some key tools:

- Create a professional profile: Create a professional LinkedIn profile and strategically connect with industry professionals, potential customers, and future investors.
- Leverage College Resources: Don't underestimate the value of guest speakers, workshops, and career services. These resources can equip you with knowledge and help you connect with inspiring professionals.
- Strategic Networking: Go beyond just attending events. Introduce yourself to speakers, guests, and professionals, even if they seem outside your immediate field. You never know who might be a valuable collaborator or future investor.
- Content is King (and Queen): Start researching and creating content relevant to your potential startup niche. This could be blog posts, articles on LinkedIn, or participating in online forums. Share your learnings, successes and failures (with context), and insights about your industry.

Living and Breathing Your Brand:

- Authenticity is Key: Be genuine and passionate in your online and offline interactions. People connect with those who are real and relatable.
- Walk the Talk: If your startup idea already has a product or service, use it! Advocate for it! This showcases your belief in your vision.

Building Your Ecosystem:

- Volunteer and Collaborate: Volunteer for organizations or events relevant to your niche. This allows you to gain experience, network with potential customers, and demonstrate your passion.
- Join Groups and Communities: Connect with others who share your entrepreneurial spirit! Join online and offline communities related to your field. This fosters collaboration, knowledge sharing, and potential partnerships.

By building your personal brand early, you'll be miles ahead when you launch your startup. So join SACCEll and start now!

PRIME STUDENT TINKERING FUND APPLICANTS

SACCEll is assisting this cohort with their application to the PRIME Student Tinkering Fund, which could provide crucial resources to move their concept forward. We're proud to support them as they apply for the PRIME Student Tinkering Fund, and we can't wait to see their businesses flourish, regardless of the funding outcome.

While we've highlighted six student applicants here, two additional applicants Niroda Sapam and Melanie has been featured in other sections.

Founder: Anupoma Singha
Semester: 5th Sem BBA
Venture Name: Sugar Botique

Founded by Anupoma, Sugar Botique breathes new life into discarded materials, transforming them into unique, eco-friendly and customised clothing.

Sugar Botique stands out with its triple-impact approach: upcycling materials, customizing designs, and donating a percentage of sales to support good causes.

exploring funding options, Sugar Botique aims to expand its product line, collaborate with local artisans, and establish a strong online presence.

The venture not only offers stylish, sustainable fashion but also educates consumers about the importance of ethical clothing choices.

Founder: Lamandaphi
Semester: 5th Sem, BBA
Venture Name: HeiNit Creation

HeiNit Creation, a student-run venture by Lamandaphi Vanesa Dkhar specializing in beautiful, handcrafted crochet pieces. Her passion for crochet was passed down through generations in her family and has blossomed into a business.

She is passionate about sustainable practices and fostering a love for handmade goods. Lamanda aims to promote handcrafted goods, empower artisans, and champion sustainable practices. With funding support, she plans to turn HeiNit Creation into a nationally recognized brand, all while preserving her family's legacy and empowering her community.

Founder: R E Jeova Gandolf Lyngkhoi
Semester: 5th Sem, Commerce
Venture Name: HRorbit

Jeova identified a critical need in the state: bridging the gap between job seekers and employers. His venture aims to address key challenges in the employment landscape, including the lack of accurate information, poor communication between job seekers and employers, and the essential skills deficit among candidates. What sets this agency apart is its comprehensive approach. Beyond just matching candidates with jobs, it focuses on skill development to prepare job seekers for available opportunities, partnering with both public and private organizations, and offering a larger pool of qualified candidates through expert screening. Jeova's vision extends beyond profit, aspiring to contribute to Meghalaya's economic growth by ensuring meaningful employment for its residents. Exploring funding options along with support from the program, including mentorship, networking opportunities, and potential funding, this venture is poised to make a significant impact.

Founder: Lizandria Shylla
Semester: 6th Sem, BBA
Venture Name: KnotLiz

Lizandria's business, KnotLiz, is built on a love for crochet and a desire to create. What began as a hobby to craft a personal sweater vest has blossomed into a business offering unique and personalized crochet keychains, plushies, and more.

Lizandria's journey is one of resourcefulness and resilience. Starting with limited funds, she meticulously planned her brand and sourced materials. Recognizing a crowded market, she focused on high-quality, affordable products that resonated with college students. Through challenges like delayed shipments, Lizandria learned valuable lessons in adaptation and building a reliable supply chain.

Lizandria aspires to connect crochet enthusiasts and those who appreciate handcrafted artistry. Exploring funding options, she plans to expand her reach, offering workshops and potentially even designing her own patterns.

Founder: Wansara Nongsiej
Semester: 5th semester BBA
Venture Name: Batter it Better

Wansara of Batter it Better's journey was tough. Limited resources and a crowded market threatened to dim Wansara's dream. But she's no stranger to getting her hands dirty. Social media savvy and constant practice honed her skills, while strategic planning helped her rise above the competition.

One holiday season, a power outage and equipment malfunction nearly turned into a recipe for disaster. Instead, it became a defining moment. Wansara learned the importance of backup plans, and now her sights are set on a dedicated space and a wider customer base.

Securing funding will be crucial in helping Wansara overcome branding, marketing, and equipment challenges. With clear short-term goals, including identifying her target audience, Batter it Better is poised for a sweet rise.

Founder: Uday Kumar
Semester: 5th Sem, Commerce
Venture Name: Scooty Rentals

Uday, an enterprising student has turned a keen observation into a thriving business. Noticing the influx of tourists seeking affordable ways to explore the city, he has launched a two-wheeler rental service that's quickly gaining traction.

The venture provides a pocket-friendly solution for couples, friend groups, and solo travelers to experience Shillong's beauty at their own pace. Despite initial challenges like theft concerns and competitive pressures, innovative solutions such as GPS tracking have helped his business grow.

Exploring funding options, Uday is now looking to expand their online presence and improve search rankings. His ultimate vision is to scale this model across Meghalaya and potentially nationwide, revolutionizing budget-friendly tourism.

5th April

CASH BOOK-KEEPING

On April 5th, SACCELL organized a hands-on cash bookkeeping workshop led by Sir Shivaraj Bhardwaj. The session began with a group shopping activity, followed by instruction on bookkeeping principles.

Key takeaways included:

- Understanding cash bookkeeping fundamentals
- Applying concepts through real-world simulation
- Developing teamwork and communication skills
- Recognizing the importance of detailed financial record-keeping

This workshop provided Anthopreneurs with practical financial skills, supporting their entrepreneurial development in a collaborative setting.

UPCOMING EVENTS

September, 2024

FRIDAY NIGHT JAZZ FESTIVAL

11th April, 2024 | 7:00 PM - 10:00 PM

ANTHOPRENEUR SPOTLIGHT

Name: Ethan Nathaniel Kharjana
Dept: Economics

Q: Did you always dream of being an entrepreneur?

A: Actually, being an entrepreneur never struck my mind. I had a rough sketch of what being an entrepreneur is, but it was never on my bucket list. Seeing mega entrepreneurs around the world breaking barriers and following their dreams gave me a little prick in my heart to try entrepreneurship. Even though I might fail, the risk and hard work is what drives me.

Q: How did you first learn about SACCEII?

A: I've seen SACCEII hosting events and programs here and there, but I never got a chance to join any of them. When I saw a post about joining SACCEII, I wanted to give it a shot. Seeing all the prior sessions drove me to become a member.

Q: Can you share a favorite moment from your time in SACCEII?

A: My most memorable moment would be a session on 3D modeling by Turbit. It made me realize how entrepreneurs can use such technology to brainstorm their ideas. The most favorite part about SACCEII is the wonderful and innovative people I've met.

Q: What skills have you developed through SACCEII?

A: SACCEII gave me a bunch of skills. It improved my communication skills, listening skills, teamwork, and helped me put my crazy ideas into actual innovation. I've also gained entrepreneurship skills such as managing and event planning.

Q: Can you tell us about your entrepreneurial dreams?

A: I'm currently working on some coffee ideas, but due to my college schedule, I'm unable to execute it fully. I'm still working on it and hope there will be a smooth execution of my project in the future.

Q: How has SACCEII helped develop your entrepreneurial mindset?

A: I've always had an entrepreneurial vision, but its execution was never possible. Now that SACCEII has given me a number of skills and confidence, I've been working on my idea for a few months. I've met with some failures, but it didn't stop me from pushing myself more and more.

Q: What are your future plans?

A: I've applied to certain universities for my MA in Economics. My plan is not only to get a master's degree but also to gain exposure and build connections. Going for further studies won't stop me from pursuing my entrepreneurial dreams, although it might delay them a bit.

Q: Any fun facts about yourself?

A: I'm already part of a production team called "PESKY OWL PRODUCTIONS," which can also be considered an entrepreneurial journey. My team and I have been working on different events and programs. So yes, I'm very much interested in the media world too!

Q: What would you say to Anthonians who are hesitant to join SACCEII?

A: To all the Anthonians who are hesitant to join, just take a leap of faith and believe in yourself. No one knows what's in store for you, so why not give SACCEII a shot? It might actually benefit you more than it benefited me.

Ending Note

As we bring this edition of our newsletter to a close, we are filled with immense pride and optimism for the future of our student entrepreneurs. Their stories are a powerful reminder of what can be achieved with passion, dedication, and the right support.

This issue holds a special place in my heart as it will be my final newsletter as my internship period ends. Working alongside these inspiring student entrepreneurs has been a privilege. Their determination, creativity, and sheer grit in the face of challenges showcase the incredible potential within our student community.

Remember, if you have a business idea brewing, don't hesitate to reach out! SACCEll offers a supportive network, mentorship opportunities, and resources to help you transform your dream into a reality you can touch.

We also extend an open invitation to potential collaborators and mentors. If you're passionate about nurturing young talent and have expertise to share, we'd love to hear from you. Your support can make a significant difference in these students' entrepreneurial journeys.

As we shift gears for a bustling next month packed with exciting activities, workshops, and events, we encourage you to stay connected with us through our social media channels to stay updated on all the latest happenings.

The SACCEll team is eager to see you at our upcoming events and to keep supporting you on your entrepreneurial journey. Until then continue to dream big, take calculated risks, and never lose sight of your passion. SACCEll will always be here to support you every step of the way.

We look forward to witnessing your continued growth and success in the months and years to come.

Warm regards,
Vila Theunuo
